ADDRESS:

2-H-13, M.N. III, Kota Rajasthan India

ABOUT

As a **Front-End Developer**, I am responsible for transforming design concepts into fully functional, visually appealing, and user-friendly web pages. This involves writing clean, semantic HTML to structure content, styling it with CSS to match design specifications, and ensuring that all elements are responsive and accessible across various devices and screen sizes. I implement interactive features using JavaScript and frameworks like React, while collaborating closely with designers to bring their vision to life and working with back-end developers to integrate dynamic content. My goal is to ensure the website or application is both aesthetically pleasing and performs seamlessly for users.
